ACADEMIC PROJECT

Project name	: Home automation system using Alexa
Language of implementation	: Embedded C
Team Size	: 6
My Role	: Team Leader

Description:

   This project aims to develop IOT based control of home appliances system. That gives user to complete control of home appliances over remotely using IOT from anywhere in the world. The home appliance operated by basic power and it controlled and operated by user through ALexa Voice assistant. The main part of NODEMCU is that it acts as an interface between hardware component and software.

OWN INTEREST PROJECT

Project name : Share market profit-loss recorder.

Framework: React JS , Bootstrap.

Database: MySQL.

Description: In Share market, past data is very important to avoid losses. My web application used to save the data of every trade manually by the Trader to see the past mistakes and correct the mistake to get profits.

Extra group project: Billing Software using PHP with Laravel framework.

AREA OF INTEREST

   ✔ Web Design and Development.

   ✔ Backend development.

PERSONAL STRENGTHS

- ✔ Leadership quality.
